

LOUIS LENOUVEL

Final-year Engineering student at ISEP, specialization in Artificial Intelligence

+33 6 65 44 88 94 | louis.lenouvel@eleve.isep.fr | [Louis Lenouvel](#) | [GitHub](#) | [Portfolio](#)

Rigorous, autonomous, and results-driven, I am completing a 3-year Data Engineering apprenticeship. Available from September 2026 for junior Data Scientist / ML Engineer roles.

PROFESSIONAL EXPERIENCE

Data Engineer Apprentice, IKIGAI Games for Citizens Paris, France | Sept. 2023 - Sept. 2026 (3 years)

- Designed an xAPI pipeline processing over 5 million educational data points, with automated dashboard generation for direct business use
- Reduced data quality errors by 20% through automated quality controls and data standardization

EDUCATION

Master of Engineering (Bac+5), ISEP Paris, France | 2023 - 2026

Specialization: Artificial Intelligence - Computer Vision, Machine Learning, Deep Learning, Optimization

Academic Exchange, Hanze University of Applied Sciences Groningen, Netherlands | Feb. - Apr. 2026

Track: System Modeling, Leadership & Intercultural Teamwork

Bachelor of Technology in Computer Science, Universite Paris Cite (Descartes) Paris, France | 2021 - 2023

Track: Development & Data

PROJECTS

DeepRetriev, RAG Pipeline from Scratch (Solo) 3 months

- Built a full RAG pipeline without any framework (ChromaDB, sentence-transformers, hybrid search BM25+RRF, re-ranking, no LangChain)
- MLflow evaluation (Recall@k, MRR, LLM-as-judge) across 45 Q/A pairs, embeddings x chunking experiments
- Production-ready: FastAPI, Docker, CI/CD GitHub Actions, Streamlit UI

MetroVision MLOps, Production ML Pipeline (Team) 4 months

- Industrialized a computer vision system (CNN + k-NN) into a deployable, observable, and reproducible service
- Kubernetes deployment (minikube + OpenShift) with Prometheus/Grafana monitoring
- Drift detection via Evidently AI, MLflow tracking, CI/CD GitHub Actions

PowerShift, Energy Grid Simulation Platform (Team) Hanze University, Netherlands | 3 months

- Async backend with FastAPI/SQLAlchemy, PyPSA energy modelling, Azure deployment (Key Vault, NeonDB)

SKILLS

Languages: Python (Pandas, NumPy, scikit-learn, TensorFlow, PyTorch)

Machine Learning: supervised/unsupervised models, evaluation & metrics, feature engineering

Deep Learning & Vision: CNN (EfficientNet), OpenCV

GenAI / RAG: ChromaDB, sentence-transformers, Ollama, hybrid search (BM25+RRF), LLM-as-judge

Data Engineering & BI: SQL (PostgreSQL, MySQL), SQLAlchemy async, MCD/UML modelling, FastAPI, ETL, xAPI ingestion, Clean Architecture, Power BI (interactive dashboards & DAX)

MLOps & Deployment: Docker (multi-stage), docker-compose, Kubernetes, OpenShift, GitHub Actions, MLflow, Hugging Face, Prometheus, Grafana, Evidently AI, Azure (Key Vault, NeonDB)

Other: Angular, TypeScript, Node.js, REST APIs, Git/GitHub, VS Code, Jupyter, Gradio, Streamlit

LANGUAGES

French: native | English: B2 (TOEIC 885) | German: basic

INTERESTS

- Judo (6 years), working towards black belt
- International: travel (Germany, UK) and Erasmus exchange in the Netherlands
- AI watch (Computer Vision, Deep Learning) and personal API projects
